Named after the title, the PCCM transformation is a simple, explicit algorithm that creates large, smoothly joining bicubic Nurbs patches from a refined Catmull-Clark subdivision mesh. The resulting patches are maximally large in the sense that one patch corresponds to one quadrilateral facet of the initial, coarsest quadrilateral mesh before subdivision. The patches join parametrically C2 and agree with the Catmull-Clark limit surface except in the imm ...

Keywords: CAD, curves & surfaces, geometric modeling

2 [Exact evaluation of Catmull-Clark subdivision surfaces at arbitrary parameter values](#)

Jos Stam

July 1998 **Proceedings of the 25th annual conference on Computer graphics and interactive techniques SIGGRAPH '98**

Publisher: ACM Press

Full text available: [pdf\(356.03 KB\)](#)
